**reduce
environmental
impact**

“ Labor savings is having the employees focus on the customer and/or producing the products for the customer, where we don't have to sit and babysit a garbage can. It totally frees [the employees] up to give the customer a better experience in the restaurant. **”**

– Bruce C., Facilities Supervisor,
McDonald's for over 30 Years

Original ecotrash®

“Compaction Technologies does hit a lot of my departments that I oversee, and not only is it a more sustainable practice, it's also very cost efficient for us.”

– Steve H, Associate Vice Chancellor of Operations
Top 10 College Dining Halls, Princeton Review, Niche

“The goal was to reduce the plastic bags [and] hours of service for staff to pull the garbage, which we have achieved. We have also achieved the look and feel of the garbage area — that is much cleaner and fresher. When you are going to eat food the last thing you want to see is overflowing garbage.”

– Nadeem S., Resident District Manager
Top 10 College Dining Halls, Princeton Review, Niche

Improve guest experience and cut operating costs! Easily keep dining rooms clean and retain employees with Compaction Technologies dining room trash compactors.

Experience: Consumer-Friendly for Improved Customer Experience

- No more overflowing trash cans
- Hands-free deposits
- Fast cycle times with LCD read out make waiting a non-issue
- Customizable finishes and branding

Efficient: Patented Technology

- Compacts 6 loose trash bags into 1
- Allows your employees to focus on customers instead of trash
- Easy to clean and maintain
- Space efficiency: One Original ecotrash compactor equals two to three large trash receptacles

Eco-Friendly: Reduce Environmental Impact

- Significantly fewer trash bags used
- Decreased volume of trash impacting landfills
- Reduced amount of fuel used for hauling
- Reduced emissions by garbage trucks
