Cleaning

> **WARNING - DO NOT SPRAY INSIDE OR OUTSIDE OF MACHINE WITH PRESSURIZED WATER.**
> **Clean like the inside of microwave. Do not use excess water inside.**

1) Wipe down machine with clean rag or disposable wipe when trays are collected or as machine needs cleaning.
2) A full machine cleaning should occur once a week or as often as other trash receptacles.
3) Insert key on right of machine.
4) Turn key clockwise, push then pull to open door.
5) Pull out bin.
6) Clean inside and outside of bin with all purpose cleaner. Use non-bleach or non-chlorinated products.
7) Remove black plastic compactor head cover.
8) Place head cover in bin and clean.
9) When necessary head cover can be taken to sink and given a more thorough cleaning.
   - Compactor head cover should be cleaned once a week.
10) Wipe down inside of machine.
11) Insert clean bag then push bin back into machine.
12) Place head cover on compactor head.
    - Head cover frontside is notched and labeled "FRONT", backside is flat.
13) Shut door.
14) Spray outside of machine with all-purpose, non-bleach, non-chlorinated products and wipe with clean towel.
15) When cleaning front trash door, turn key counter clockwise to lock into position.
    - This will stop the door from opening and make it easier to clean.
16) To clean behind compactor unplug machine and pull away from wall.
17) Sweep behind compactor as needed.
18) Mop behind compactor.
19) Plug compactor in and push back into position.
20) Machine LCD Screen should display "READY" when ready for use.
